An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: With respect to claim 17, please delete " especially ". It was done to avoid a U.S.C. 112 rejection.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: With respect to claim 12, the Prior Art does not teach a first operational mode for a normal motor operation in which an alternating current is impressed into at least one of the coils of the stepper motor, and a second operational mode for detecting a reference position of the stepper motor from an increase of the load caused by driving the stepper motor against a mechanical stop, by comparing the level of a measuring current flowing in the coil, with at least one lower threshold value, wherein the level of the measuring current is determined substantially by the phase of a voltage which is counter induced by a rotor of the motor in the coil, wherein the reference position is set and defined, respectively, the measuring current becomes smaller than the lower threshold value, and wherein the second operational mode for the coil is activated during a time window of the first.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erick Glass whose telephone number is 571-272-8395. The examiner can normally be reached on 8-5 M-F.
